IpanemaCloud Central Management is a cloud-based service management platform. It leverages Ipanema's carrier class management software and combines it with a secured service portal.

IpanemaCloud Central Management is used by partners to quickly deliver Ipanema as a service while customers use it to manage the Ipanema estate in-house, enjoying the flexibility and scalability of a cloud service.

IpanemaCloud Central Management gives the ability to manage the full lifecycle of the Ipanema solution including provisioning, monitoring, alerting and reporting as well as asset management.

IpanemaCloud can work in conjunction with Ipanema Zero Touch Installation.

Key Benefits

- Free up cash with an OPEX based business model.
- Free up resources to focus on your core business.
- Speed up deployments with a ready to use management platform.
- Get maximum value with an always up to date management platform.
- Avoid hidden costs with a transparent cost model.
- Avoid dependency on specialist resources.

Central Management Features

- **Availability:** IpanemaCloud was designed keeping continuous operations in mind even in the event of software upgrades.
- **Security:** Easily comply with regulations and standards like ISO 27001 using secure Service Portal authentication. Optional IPsec VPN tunneling between the customer network and the IpanemaCloud is available.
- **Elasticity & Scalability:** Ipanema operations monitor computing and data space usage and automatically adjust compute resources to the requirements.
- **Release Management:** Management platform is always up-to-date. Each software upgrade is scheduled and automatically carried out by Ipanema staff.
- **Backup:** Daily backup and two weeks archiving of configuration and databases.
- **Traceability:** Keep trace of system and configuration changes.

- **Reversibility:** Want to move from the cloud to on-premise? Ipanema can provide you with configuration files, log files and reports.
- **Best of breed:** IpanemaCloud leverages industry leading certified technology partners; Rackspace hosting and force.com for the Service Portal.
- **Support:** Technical support and userguides.

Central Management Options

- Dedicated Central Management environment.
- Datacenter location other than United Kingdom.
- Service Portal and report branding.
- IPSEC VPN connection between IpanemaCloud and customer network.

Minimum Requirements

- One Central Platform Administrator portal account.
- 25 Ipanema appliances.
- 12 months subscription.
