

WooHoo X and Y Series

Elevating Luxury
Hospitality & Enhancing
Senior Care with
Generative AI Voice
Assistance

WooHoo is empowering businesses to keep pace with evolving customer expectations with their WooHoo X and Y series devices. These innovative, AI-powered solutions serve as an in-room personal assistant that not only enhances the user experience through accurate and custom responses, but also streamlines business operations by offering detailed insights into user preferences. The X-Series integrates directly with hotel point of sale tools and delivers an intuitive centralized system for managing bookings and orders, ultimately saving staff time and helping increase in-room revenue. The WooHoo Y-Series aids in facilitating senior care with a voice enabled smart system which provides medical video conferencing, custom activity reminders, and offers the added security of relaying alerts to emergency services. Leveraging 3rd Gen Intel® Xeon® Scalable processors, WooHoo was able to optimize text-to-intent classification, resulting in faster performance and enabling businesses to deliver a superior overall user experience across devices.
