NRF 2025: Shaping the Future of Retail
Powered by Intel

Automated Returns Kiosk (ARK)

Simplify the returns process for customers and in-store staff with our Automated Returns Kiosk. This solution makes returning items fast, convenient, and hassle-free. As ecommerce sales begin to encroach on brick-and-mortar shopping, Automated Return Kiosks offer a valuable opportunity to drive in-store foot traffic when customers return online purchases in store (BORIS).

Our new ARK-Compact offers the same customer return convenience in a smaller footprint, while the Through-Wall ARK handles large return volume with ease.

Bill Payment Kiosk

Streamline payments with our versatile Bill Payment Kiosk. This solution accepts cash, checks, and cards, providing customers with a secure and convenient way to pay bills. This solution provides an excellent opportunity for service providers with brick-and-mortar retail locations, such as cell phone carriers, to offer their customers a quick and reliable option to pay bills with cash or check. This solution is powered by Intel.

Cash to Card Kiosk

Retailers can eliminate expensive and time-consuming cash handling by offering Cash to Card Kiosks. This solution converts cash into prepaid cards, giving customers a secure and versatile payment option. While several states and municipalities require retailers to accept cash payments, Cash to Card Kiosks keep retailers in compliance with local regulations while benefiting from cashless operations.

KIOSK Integration Exchange

Our KIOSK Integration Exchange software partners make it easy to integrate cutting-edge technology into your kiosk application. Find out how facial recognition, video conferencing, dynamic advertising, and more can add value to your kiosks' user experience.

Remote Monitoring with KNECT IoT

Optimize your operations with KNECT IoT, our state-of-the-art remote monitoring software. This demo will show you how KIOSK can monitor, manage, and maintain your deployed kiosks remotely, ensuring maximum uptime and operational efficiency. Discover the benefits of real-time alerts and detailed reporting.

Plan Your Visit

KIOSK is committed to delivering self-service solutions that meets the evolving needs of the retail industry. When you visit our booth at NRF you will...

- See live demos of the latest in self-service retail technology.

- Connect with our team of experts who can help you find the right solution for your business.

- Discover how kiosks and self-service automation can enhance your operations and customer experience.

Explore Innovation at KIOSK - Booth #6003 at NRF 2025

KIOSK Information Systems is excited to invite you to Booth #6003 at NRF to see the latest in self-service retail technology. We're showcasing self-service solutions designed to streamline operations, enhance customer experiences, and drive business efficiency. Find out more about what you'll see at booth #6003.

NRF 2025 is the must-attend event for retail professionals, and KIOSK Information Systems is thrilled to be a part of it. Mark your calendar for January 12-14 and make Booth #6003 your destination for retail innovation. Schedule a meeting with our team to make the most of your visit.

We look forward to seeing you there!
