Solution Overview

Dell Generative AI Solutions with Intel combine the power of Intel Gaudi 3 AI accelerators with Dell servers, storage, networking, professional services, and open-source software to provide jointly engineered, tested and validated solutions that ensure a seamless deployment experience. Proven with Dell Validated Designs, these solutions can help you right -size your GenAI investment to support your targeted AI use cases and accelerate business outcomes. These innovative solutions deliver high performance at scale and the flexibility to choose the software, ethernet and implementation model that best meet your needs.
