

Solution Overview

WaitTime™, powered by Intel® Xeon® processors, delivers AI-driven crowd analytics to optimize operations and customer experiences. By anonymously analyzing real-time video, WaitTime™ identifies inefficiencies, reduces wait times, and boosts revenue across verticals such as retail, sports, and transportation. Its customizable UI and proprietary algorithms provide actionable insights at the edge, ensuring secure, scalable, and ethical solutions.

Used globally, including venues like Mall of America, WaitTime™ exemplifies innovation, harnessing Intel® technology to revolutionize crowd management for improved outcomes.
